Re: Cow Palace Safety Debris Catch Basin Basis of Design Report
Administrative Order on Consent ("Consent Order")
Docket No. SDWA-10-2013-0080
Yakima Valley Dairies, Washington

Dear Mr. Larsen:

EPA has completed our review of:

- Cow Palace Safety Debris Catch Basin Basis of Design Report 90% Design Submittal (May 15, 2019)

Based on our review, EPA has developed these comments:

1. Add three figures to the Report:
 - a map showing the locations of the borings
 - two cross section diagrams --- north-south and east-west --- based on data (including the boring logs) and showing lithologic information, the outline of the original lagoon, the proposed outline of the new lagoon, and the boring locations and depths.
2. Add a statement to the Report that previously lined Cow Palace lagoons have been examined and assessed by Respondent, and based upon that assessment there is no need to change any of the previous designs that are now being used again in this design. If there is anything that did not worked as planned, or if any other changes to the design have been made, highlight these changes to the design in the text.

Pursuant to Paragraph 14 of the Consent Order, Respondent must address these comments and re-submit this document no later than July 2, 2019. You may contact me at (206) 553-6904, or your legal counsel may contact Jennifer MacDonald at (206) 553-8311, if you have any questions regarding this letter.

Sincerely,

A handwritten signature in black ink, appearing to read "Eric Winiecki", with a stylized flourish at the end.

Eric Winiecki
